SOFTWARE ENGINEERING || FULL STACK DEVELOPER || CYBER SECURITY

Backend Development • APIs • Cloud • Artificial Intelligence • Machine Learning

Computer Science undergraduate with strong foundations in Data Structure , Machine Learning and hands-on experience in building scalable backend systems and RESTful APIs. Passionate about solving real-world problems through efficient and optimized software solutions, with a keen interest in system design and performance optimization.

EXPERIENCE

ShadowFox Inc. - Vulnerability Assessment & Penetration Testing Intern

Apr 2024 — Dec 2024

- Conducted Network and application vulnerability assessments using Nmap, Burp Suite, and automated scanners -
- Executed OWASP Top 10 & SANS Top 25 based penetration tests: identified misconfigurations, high-hisses
- Assisted SOC operations by analyzing SIEM alerts (Splunk, QRadar, Azure Sentinel), and escalating security incidents - Improved security posture by documenting vulnerabilities with remediation steps for ideas.

Tech: Nmap, Burp Suite, OWASP, Splunk.

DsaStats — Full Stack Intern

Jan 2025 — Present

Built responsive frontend interfaces using React, HTML, CSS, JavaScript

- Developed and integrated REST APIs using Node.js, Express, Django
- Collaborated in end-to-end feature development with Git, GitHub, Firebase .
- Optimized UI performance and API reliability in production workflows

Tech: Flutter, firebase, Google Maps API's,5 Raspberry PI, OpenCV

PROJECTS

- FoodBridge — Flutter + Firebase Mobile App
 - Designed a real-time food donation platform connecting hotels and NGOS to reduce food waste.
 - Implemented secure user authentication, food listing, and Google Maps-based navigation.
 - Built scalable backend using Firebase Firestore, Cloud Functions

Tech: Flutter, Firebase, Google Maps API, Dart

- [Cyber Threat AI](#) – Machine Learning + Web App
 - Designed a multimodal AI system to detect fake news, scams, phishing, and deepfake content using ensemble intelligence.
 - Implemented real-time threat analysis using NLP models, heuristic rules, and multimodal fusion (text, image, video).
 - Built a scalable backend with FastAPI integrating explainable AI, fact-checking, and feedback-driven learning pipelines

Tech: Python, FastAPI, Streamlit, Transformers, Scikit-learn, OpenCV, SQLite, Firebase

EDUCATION

- Pranveer Singh Institute of Technology
 - Bachelor of Technology in Computer Science
 - GPA-7.2
 - Courses- Operating system, Data Structures, DataBase Management System, CryptoGraphy, Computer Networks .
- S.R. Education Centre
 - CISCE – Intermediate ; Marks : 81.5% Percentile

Kanpur, India

Oct 16 2023 – Present

Kanpur, India

Apr 2012 - 2022

SKILLS

« Programming: Python, Java, C+ +, JavaScript, Sql,Css

• Security: VAPT: OWASP Top 10, SIEM Monitoring,

• Web & Backend; React. Nodejs, Express, Django, REVTAPIS

• Databases: MySQL, SQL Lite, MongoDB, Firebase

» Tools & Cloud -Docker, AWS, Linux, Burp Suite, Nmap

ACHIEVEMENTS

- Solved 300+ DSA problems on LeetCode & GfG
- Built and deployed – CyberThreatAI web (April ,2026)
- Built and deployed FoodBridge App (October, 2025}
